

# Cleaning Sponge Swabs

## Description

---

These dustfree foam sponge swabs are used for the cleaning of ink related parts such as wipers, cap tops and printheads (**never clean the nozzle face with a swab, only clean the surroundings**). These swabs don't leave any dust or fibers on the cleaned surface, contrary to the cheap cotton or foam swabs. A long, rigid handle and large internal head paddle provides firm support.

## Features

- Dustfree foam sponge swabs specially designed for cleaning delicate printer parts
- Thermally bonded head
- Soft and nonabrasive.
- Length: 122mm
- Width: 11mm

## Benefits

- Ultra low non-volatile residue
  - Low particle and fibre generation
  - Good sorbency
  - No contaminating abrasives
  - Excellent chemical resistance.
-
